

AGPRO MARKER FOAM

AGPRO MARKER FOAM is a highly concentrated foaming solution which forms dense white, long lasting foam blobs to assist in marking exactly where the pesticides or fertilisers have been applied.

It helps to prevent skips and overlaps and produces excellent foam even under extreme conditions. The product is biodegradable and non-toxic and contains a water softener to allow excellent foam to be produced even when mixing with hard water.

SAFETY PRECAUTIONS:

- Keep out of reach of children.
- Avoid contact with eyes and skin.
- Wash hands after use.

MIXING PROCEDURE & APPLICATION RATE:

AGPRO MARKER FOAM should be shaken well before use. Use 5 - 7ml per 1000ml of water. Fill the foam generating tank approximately half full with water before adding **AGPRO MARKER FOAM**. Disperse the product and then add remainder of the water. Incorrect addition rates and excessively high pressures can cause poor results. Flush equipment with clean water.

COMPATIBILITY: Compatible with most pesticides and liquid fertilisers.

STORAGE AND DISPOSAL:

Store in the closed, original container in a cool, dry, well-ventilated area out of direct sunlight and away from foodstuffs and drink containers. Triple rinse empty containers adding the residue to the spray tank. Dispose of empty container by burial at an approved disposal site.

CONDITIONS OF SALE:

The use of AGPRO MARKER FOAM being beyond the control of the manufacturer, no warranty expressed or implied is given by AGPRO NZ LTD regarding its suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not and AGPRO NZ LTD accepts no responsibility for any consequence whatsoever resulting from the use of this product.
